## IN BRIEF

### India actively shaping the future, says Ruchira Kamboj

India is actively shaping the future and its young minds are leveraging technology as a powerful tool to accelerate progress towards the Sustainable Development Goals (SDGs), India's envoy to the United Nations has said. Addressing the '1M1B Activate Impact Summit', India's Permanent Representative to the UN Ambassador Ruchira Kamboj said India truly believes in the "transformative power" of youth. "We recognise that the path to achieving the SDGs by 2030 is through harnessing the energy, the creativity and the innovation of our young population. India is home to the world's largest youth population. So, we are not just observing the future unfolding, we are actually actively shaping it," she said. PTI
