TO WHOMSOEVER IT MAY CONCERN

In my power as a Member of the Legislative Assembly in New Delhi, I am writing this letter of appreciation for Ishaan Avi Gupta, who has conceptualised and developed the '**Solar-Powered Water Purifier**'.

Ishaan, a grade X student at The Shriram Millennium School (TSMS), has devised an automated STEM device using renewable solar energy. His initial design has been a success and is now keen to connect with the wider community. His installations at 'Manav Mission Mission Trust', NGO schools provide a reliable supply of clean portable water to its students.

In addition, his project aligns with India's commitment to ensure universal access to safe and affordable drinking water for all by 2030 and resonates with the UN Sustainable Development Goals (UN SDGs). His efforts support the UN agenda of 'Clean Water and Sanitation (SDG 6) and affordable and Clean Energy' (SDG 7).

By attempting to address these critical aspects of community well-being, I would like to applaud Ishaan's effort and support his endeavour in scaling his device and making its benefits available to others in his community. His work serves as an inspiring model for India's youth, demonstrating how small initiatives can contribute to the fulfilment of larger environmental and developmental goals.
